

# Health Sciences PBL Classrooms

The PBL classrooms feature a computer, wireless keyboard and mouse, webcam, and television display.

## Using the Computer

The computer is hidden inside the table, physical access is not necessary to use the equipment.

Press the **POWER** button on the remote control to turn on the television.

If necessary, press the **INPUT** button to select the **PRESENTATION** input. The **PRESENTATION** input is the only input needed for all devices connected to the television.

Wake up the computer by pressing the spacebar on the wireless keyboard, or by moving and clicking the wireless mouse.

Log in using your North Central College credentials, and continue to your desired application.

## Webcam

A webcam with built-in microphone is provided above the television. The camera captures the entire conference table, and the microphone is sensitive enough to capture audio from everyone in the room.

## Connecting a Laptop or Optional Device

An HDMI cable is provided on each table for connectivity of optional devices. Connecting a device to this cable automatically overrides the table computer's image, and will display the connected device on the television.

### **If the optional device does not display on the television:**

Make certain the television input is set to **PRESENTATION**.  
Make certain the HDMI cable is firmly plugged into the device.  
Make certain the DHMI cable is firmly plugged into the table HDMI Port.

Check your device settings to confirm the external HDMI port is turned on.

For Windows, press and hold the windows key  and press P. A window will appear showing options – choose **DUPLICATE** or **EXTEND**.

For Mac computers, go to settings / displays / and choose "**Mirror Display.**"

To help force a connection when the above options do not work, completely shut down your laptop. With the TV turned on, and the HDMI cable connected to your laptop, power up your laptop. The reboot should force the device to renegotiate the connection.

Unplugging the optional device from the HDMI will automatically display the table computer again.

For assistance with the equipment in this room, please contact the helpdesk X5440.
